

life peaceful yet full of life?

community where you belong?

your neighbours enjoy life too?

A community with heart

hearth

heart

planning

where travelling
is a joy not a hassle
how you want
where you want
productively
enjoyably
adding to your health

...Roger Boulter

Good planning

great places
that don't just 'function'
nice to live in
people on the street
the wider world accessible
where getting there is nice too

...at home.....

private in community
personal but connected

balancing an artist's dreams
with a scientist's logic
neither crowding the other
creative visions
sifted technically
